

THE GAP

Texas Teacher Career Pathway Handbook

2024-2025

Dear IDEA Teachers,

Welcome to the Teacher Career Pathway handbook—a comprehensive guide designed to navigate you through IDEA’s Teacher Career Pathway program. This initiative is dedicated to acknowledging, rewarding, and fostering the growth of all IDEA teachers. We firmly believe that outstanding teachers are instrumental in fulfilling our commitment to every student’s success. The Teacher Career Pathway has been carefully crafted to ensure that IDEA becomes a place where you feel valued and recognized for the invaluable role you play in our mission to guide all students toward college success.

Sincerely,

Teacher Career Pathway Team

SECTION 1

INTRODUCTION

History & Background

Evolved from IDEA Investing in Innovation (i3) grant

Refined over 18 months with extensive teacher input

Piloted in 2014, introducing personalized placements, public recognition, and professional development budgets

- Gathered teacher feedback through a district-wide pilot survey
- Feedback used to adjust and improve the Teacher Career Pathway

The Teacher Career Pathway Task Force Held:

Establishment of the Teacher Advisory Council in 2014 for direct communication and shaping program components

Officially launched in the 2015-16 school year, reflecting IDEA's commitment to teacher support and recognition

Program Goals

To make college possible for all children, IDEA must retain its great teachers. Students benefit from having committed, professionally satisfied teachers. Organizations grow stronger with workforces that choose to stay and grow. These beliefs inform the goals of the Teacher Career Pathway.

- To value, retain, and support the development of IDEA teachers.
- To inspire and motivate teachers to grow in their practice and stay with IDEA.
- By offering payouts, recognition, and a place to grow as an educator, the Teacher Career Pathway will help keep IDEA teachers fulfilled and in the classroom.

The Teacher Career Pathway

Recognition
Support

The Teacher Career Pathway rewards teachers' contribution, supports their professional growth, and most importantly, provides a pathway for promotions so career teachers can continue their influence in the classroom. This portion of the handbook describes Teacher Career Pathway rewards, recognition, and support programs in detail.

IN DEPTH: PATHWAY PLACEMENT

Growth Mindset

With hard work, all teachers can advance up the pathway

The Teacher Career Pathway is a system that places IDEA teachers along a five-level continuum of performance. Each of the five pathway levels comes with a different slate of rewards and professional development opportunities. A teacher's pathway placement is determined each year and is based on a balanced scorecard for teacher evaluation. Teachers at the first two pathway levels receive prescriptive and individual development to support their improvement towards higher levels. Teachers at the highest three levels of the pathway receive "Grow with IDEA" accounts, retention payouts that increase over a three year period.

The philosophy behind the support and recognition along the pathway is to provide increasing autonomy as teachers progress along the pathway.

THE LEVELS:

- There are five levels on the Teacher Career Pathway.
- Each level reflects a teacher's performance on the Teacher Career Pathway evaluation scorecard, which includes five metrics: student achievement, manager ratings on the GET Rubric (with Embedded Core Values) and core values.

THE LEVELS OF THE TEACHER CAREER PATHWAY ARE:

- 1 Welcome to IDEA Teacher
- 2 Emerging IDEA Teacher
- 3 High-Performing IDEA Teacher
- 4 Advanced High-Performing IDEA Teacher
- 5 Master IDEA Teacher

1

WELCOME TO IDEA TEACHER

All new to IDEA teachers, who do not yet have a record of results on an IDEA campus or those who need a second year of highly-prescriptive development after joining the organization.

2

EMERGING IDEA TEACHER

IDEA teacher with at least one year of experience and record of results. Student achievement is nearing expectations, but not yet meeting campus and district goals. Teachers' skills as rated on the Guideposts for Excellent Teaching are typically beginning proficient.

3

HIGH PERFORMING IDEA TEACHER

IDEA teacher who consistently meets goals, with at least one year of experience, average rating of proficient on GET Rubric, positive relationships with students, parents, and colleagues. Approximately 40-50% of our teachers at IDEA.

4

ADVANCED HIGH PERFORMING IDEA TEACHER

IDEA teacher who exceeds goals, with at least two years of experience at IDEA, average rating of advanced on the GET Rubric, models strong relationships with all stakeholders. These teachers represent the top 15-20% of teachers in the organization.

5

MASTER IDEA TEACHER

IDEA teacher who consistently exceeds goals and sets innovative and visionary goals for teachers throughout district, at least 5 years of experience, average rating of advanced to exceptional on GET Rubric exemplary relationships with students, parents, and colleagues unequivocally irreplaceable. These teachers are in the highest 10% of teachers in the organization.

TCP Process Overview

SECTION 2

**TCP PATHWAY
CRITERIA &
POLICIES FOR
PLACEMENT**

Required Criteria for TCP Placement

Here are the three required criteria for TCP Placement. Each criterion plays an important part in determining how a teacher is placed.

1 TCP COMPOSITE SUMMARY

2 YEARS OF TEACHING EXPERIENCE

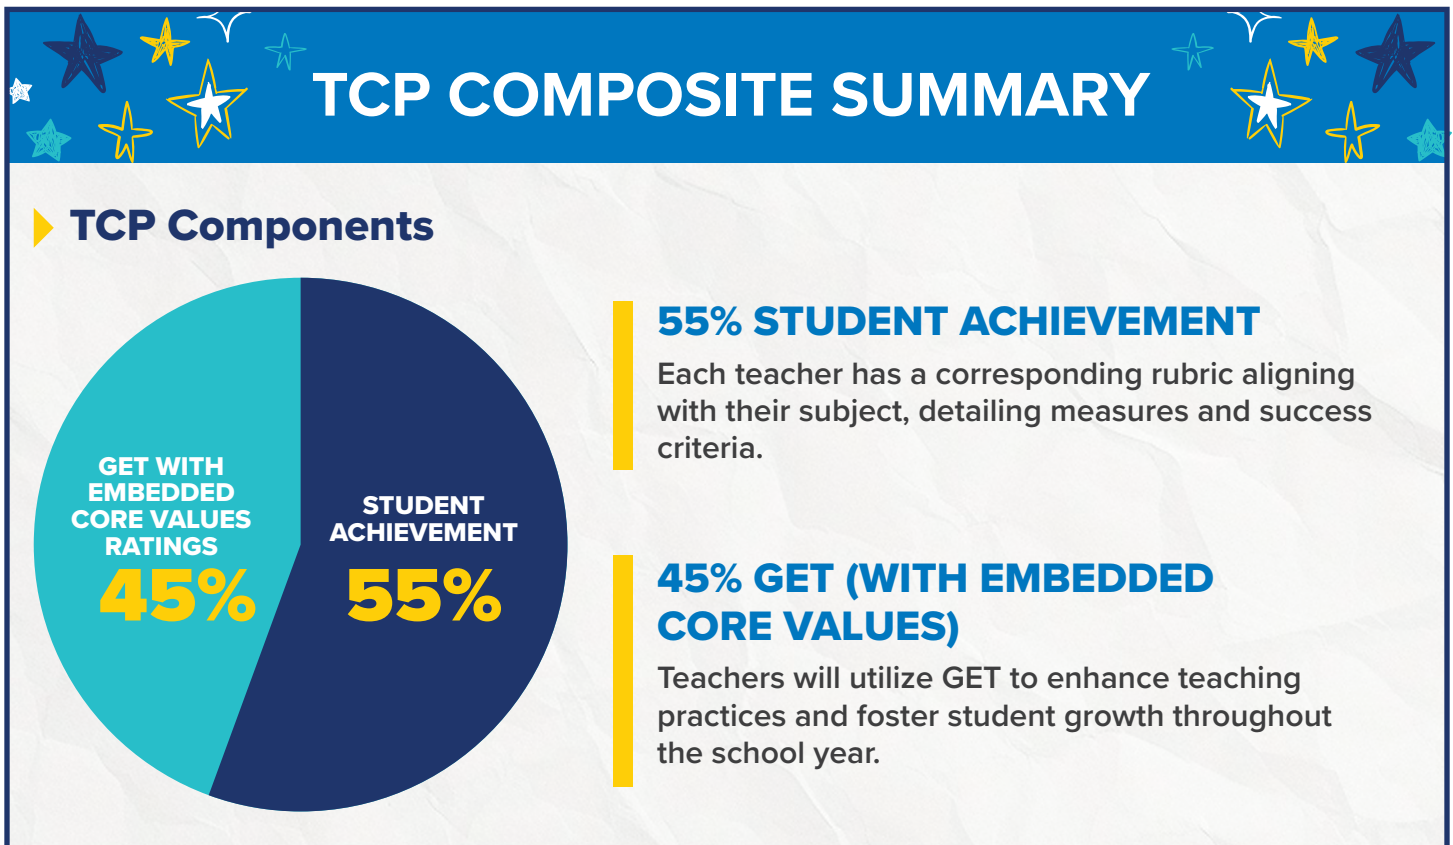

3 MANAGER & VP APPROVAL

Required Criteria: TCP Composite Summary

You might be wondering what components make up the TCP Composite Summary. The overall composite score includes student achievement and manager ratings on the GET Rubric, which include embedded core values as seen in the pie chart above.

Student achievement is weighted at 55%. Student achievement rubrics can be found yearly in our TCP Handbook, which will allow teachers to identify and track which student achievement results will be used in teacher placement. GET with Embedded Core Values and Ratings are weighted at 45% and imported from Cornerstone-Annual Performance Review at the end of the year. Each is weighted according to its impact on a teacher's capacity to put students on the road to college.

Required Criteria: Years of Teaching Experience

Standard minimum years of total teacher experience required to achieve each TCP level

In the first year with IDEA, all teachers, regardless of prior experience, begin at the Welcome to IDEA Level. After the first year, all prior teaching experience is included. Each TCP level corresponds with a minimum required number of years of teaching experience.

<p>★ NEW TO IDEA ★</p>	<p>▶ Welcome To IDEA Level 1</p>
<p>1+ YEARS OF EXPERIENCE</p>	<p>▶ Emerging Level 2 ▶ High Performing Level 3</p>
<p>2+ YEARS OF EXPERIENCE</p>	<p>▶ Advanced High-Performing Level 4</p>
<p>5+ YEARS OF EXPERIENCE</p>	<p>▶ Master Level 5</p>

YEARS OF EXPERIENCE FOR TCP ARE IMPORTED FROM OUR EIS SYSTEM.

Adding years of experience to the Pathway placement metric is a result of the Teacher Advisory Council’s input.

Please refer to the policy section of this handbook to review the Master Teacher Appeal Policy and other relevant policies that may apply to your situation. This will provide clarity on how the required criteria apply to your circumstances.

TCP Composite Summary:

★ Student Achievement Component 55%

STUDENT ACHIEVEMENT DATA

Student achievement data is heavily weighted because of its great impact on IDEA students' future options. Student Achievement is measured differently for each course based on available international (IB), national, state, and local assessments.

Additionally, many courses - such as electives - have unique measures of success, created internally at IDEA in order to measure the course's benefit for students. It is important to ensure that all teachers have a clear understanding of how student performance impacts pathway placement. Thus, rubrics for each grade level and content are published in the appendix of this handbook.

Please Note:

Given this is the heaviest weighted component on the TCP's scorecard, teachers who do not have a student achievement metric cannot earn higher than a Level 3 placement. This includes courses that do not already have a student achievement rubric created.

TEACHER INCENTIVE ALLOTMENT (TIA) CLAUSE

SLO Teacher Roles

- AP Teachers
- IB Teachers
- RISE Teachers
- Special Education Teachers

Pre-Test Post-Test Teacher Roles DIBELS

- Kinder- 2nd Grade Reading Teachers
- Kinder Self-Contained Teachers

Renaissance STAR

- 1st-2nd Grade Math Teachers
- 3rd-8th ELA & Math Interventionist Teachers
- Supporting Teachers: 3rd-8th grade ELA & Math Interventionist Teachers

VAM Teacher Roles - STAAR Teachers

- 1st-2nd Grade Math Teachers
- 3rd-8th ELA & Math Interventionist Teachers
- Supporting Teachers: 3rd-8th grade ELA & Math Interventionist Teachers

***Teachers may place with the student achievement rubric or the TIA Approved Growth Rubric whichever of the 2 is higher and most beneficial for the teacher's TCP Placement. If TIA Student Growth is at a Recognized Level, the corresponding score for Student Achievement would be a 3. If it's at an Exemplary level, the score would be 4, and if it's at a Master level, the score would be 5.. Student Achievement Rubrics will not be adjusted for the 2024-2025 Academic School Year as this is not in alignment to board policy.*

Please refer to the policy section of this handbook to review the multi-prep policy and other relevant policies that may apply to your situation. This will help you understand how to calculate the student achievement component accurately.

TCP Composite Summary:

★ GET Component 45% (with Embedded Core Values)

GET RUBRIC (WITH EMBEDDED CORE VALUES)

The Guideposts for Excellent Teaching Rubric is part of a teacher's score because it is a reliable, research-based, district-wide measure of performance in the classroom.

GET (with Embedded Core Values Rubric) scores for the Teacher Career Pathway are the same ones a teacher receives during the annual performance review (APR) with his or her manager. Managers receive intensive training on the GET throughout the year, ensuring their ability to use the tool accurately and reliably. While the GET is used for evaluation, it is also a strong tool to provide specific ways for teachers to improve their practice and develop their strengths.

Please note:

Since the GET has embedded core values into the strands, we will only use the GET with Embedded Core Values APR ratings for TCP Calculations.

TCP MANAGER & VP APPROVAL

Once years of experience and a teacher's composite score are accounted for, it's time for the final step in pathway placement:

Campus lead team members add context to the teacher evaluations and may make appeals based on their knowledge of special campus situations from the previous year.

Principals and all teacher-managers review pathway placements on their campus with the support of their VP and a Teacher Career Pathway Team member.

Manager and Vice President approval.

Managers and VPs of Schools should carefully review the following steps when approving a teacher's TCP Placement:

- 1 Refer to the TCP Rubrics to determine the necessary data for Teachers' Student Achievement Results. Retrieve Student Achievement Results Data for the Teacher prior to reviewing Teacher TCP Placement.
- 2 Access APR Data for GET with Embedded Core Values Ratings from Cornerstone.
- 3 Verify the Teacher's Name, Campus, Grade, and Content on the TCP Dashboard.
- 4 Ensure that accurate Student Achievement Data is displayed on the Teacher Dashboard by verifying that the corresponding Grade and Content assessment are accurately represented, along with the correct count of students.
- 5 Confirm that the correct TCP Rubric is associated with the Student Achievement Data.
- 6 Verify that the GET Ratings are imported from the APR into the Teacher's TCP Placement.
- 7 Validate that the TCP Composite Score and TCP Years of Experience align with the TCP Placement.
- 8 If adjustments are necessary, provide comments specifying the areas requiring modification.
- 9 Once reviewed and adjusted, approve the teacher placement.

TCP Criteria Composite Summary

Remember there are three required criteria for TCP Placement:

- ☀ TCP Composite Summary
- ☀ Years of Teaching Experience
- ☀ Manager & VP Approval

TCP Placement Calculator

Composite Component	Component Percentage	Component Criteria	Actual Score	Possible Official TCP Composite Score	Possible TCP Level	Possible Official TCP Level Placement	
GET w/ Embedded Core Values	45%	Average Score of all domains	3.41	3.19	Level 3	Level 3	
Student Achievement	55%	Based on your Content Rubrics found in TCP Handbook	3				
Required Teacher Experience Criteria			# of Total Teaching Years	Max TCP Level Placement Eligibility Based on Experience Criteria	Is Possible TCP Level Aligned to Experience Criteria?		Level 3
Teacher Experience	Based on the Teacher Experience Requirements found in TCP Handbook		12	Level 5	Yes		

This [TCP Criteria Placement Calculator](#) helps provide transparency and allows teachers to estimate their placement using the most up-to-date student achievement, GET with Embedded Core Values ratings, and teacher step information. However, this calculator does not provide an official TCP level placement, which is determined in the fall. Please follow the instructions in the Excel document to calculate your potential placement accurately.

Please refer to the policies section to better understand the various parts relevant to your situation for further guidance.

CHECKLIST

- What is your teacher step in Tyler?
- What is the Max Placement based on the teacher experience criteria?
- What TCP Rubric aligns with your content/grade level?
- Do you have multiple TCP Rubrics?
- What was your last year's 2024 GET with Embedded Core Values APR Average?
- What is your GET with Embedded Core Values APR Goal Average?

TCP POLICIES

Policies should be here but can be in a table or however you believe they will read better. For some reason it starts on the next page but should start on this page.

TEACHER CAREER PATHWAY (TCP) POLICIES		
Policy Title	Policy	Policy Rationale
Data Integrity Policy	<p>In the event of data integrity concerns, the matter will be promptly escalated to the TCP Committee for thorough review.</p> <p>If a teacher is found to violate data integrity standards, appropriate action will be taken, resulting in a grade of 0 for Student Achievement, and forfeiture of their current level and hold will not be accepted.</p> <p>If a principal and/or manager is found to violate data integrity standards, appropriate action will be taken, resulting in a documented report made to the Vice President of Schools and removal of student achievement on Teacher's TCP Placement, and the hold will not be accepted.</p>	<p>This policy ensures the maintenance of accurate and reliable data, promoting accountability and transparency within our educational system.</p>
Missing Achievement Data Compliance Policy	<p>If an exam or assessment that should have been administered is missing, a score of 0 will be assigned to the achievement section.</p> <p>Teachers cannot be rated higher than level 3 if student achievement data is missing for teachers with no TCP Rubric available.</p>	<p>We recognize that certain content areas lack a TCP Rubric and must determine the appropriate course of action.</p>
TCP Subject/Content/Grade Level Policy	<p>In adherence to our TCP guidelines, subject, content, and grade level information must be reported through PowerSchool (Texas), SIS (FL), & J-Campus (SoLA) under a role ID coded as 087 during the February annual class roster winter submission.</p>	<p>This data submission ensures accurate and timely documentation of teachers' assignments and responsibilities, forming the basis for the TCP evaluation process.</p> <p>The specified coding and submission timeline contribute to the precision and efficiency of our TCP assessments, promoting consistency and reliability in determining teacher career pathways.</p>
No Rounding Policy	<p>Our policy on rounding for Teacher Career Pathway (TCP) calculations stipulates that the overall placement will not be subject to rounding in the final calculation.</p>	<p>We uphold precision in the assessment process, ensuring that the TCP placement accurately reflects the calculated values without any rounding adjustments.</p> <p>This policy underscores our commitment to maintaining the integrity and accuracy of the TCP evaluation, promoting transparency and fairness in determining teacher placements.</p>
APR Policy	<p>If an Annual Performance Review is not conducted to represent the GET with Embedded Core Values rating portion of TCP, appropriate measures will be taken to ensure the completion of this crucial evaluation component.</p>	<p>This policy ensures that decisions regarding career placement are well-informed and based on a comprehensive understanding of a teacher's performance and contributions.</p>

TEACHER CAREER PATHWAY (TCP) POLICIES

Policy Title	Policy	Policy Rationale
<p>Teacher Career Pathway Dashboard Policy for Leaver & Returning Teachers</p>	<p>If teachers return to the classroom at IDEA Public Schools after being placed on the Teacher Career Pathway (TCP), their most recent TCP placement is on file.</p> <p>If a teacher leaves and their GET with Embedded Core Values APR and/or student achievement data is missing, their default placement will be determined by the previous year's placement. If they are a new teacher, they will be assigned a Level 1 placement for record-keeping purposes and in case they return to work for IDEA.</p>	<p>Acknowledging teachers' TCP placement, even upon their return, ensures fair recognition of their experience and contributions, preserving valuable historical data and honoring their professional journey.</p> <p>For returning teachers at IDEA Public Schools, recapturing TCP placement streamlines onboarding, facilitating a swift integration into the career pathway framework, and reducing administrative complexities.</p>
<p>Weight Policy</p>	<p>In cases where a student achievement rubric comprises more than one row, each row is assigned a specific weight.</p> <p>The teacher's total student achievement score is then derived by calculating a weighted average, reflecting the proportional significance of each performance category in the overall assessment.</p>	<p>This approach aims to provide a more accurate representation of a teacher's impact on student achievement by appropriately weighing the various dimensions outlined in the rubric.</p>
<p>Multi-Prep Minimum Counts and Student Achievement Weighted Average Policy</p>	<p>All teachers' multi-prep courses will factor into their overall accountability for student achievement.</p> <p>There's no minimum student count requirement for a course to be considered in assessing a teacher's student achievement score.</p> <p>A weighted average approach will evaluate teacher accountability across multi-prep courses. The performance of students in each course will be weighted according to various factors using the multi-prep student achievement calculator.</p>	<p>This policy is designed to ensure that all teachers' efforts in multi-prep courses are appropriately recognized in their overall accountability for student achievement. This promotes objectivity and consistency in the evaluation process, helping to ensure fair outcomes.</p>
<p>TCP Policy on TIA Designation Impact</p>	<p>This policy clarifies that a staff member's TIA designation, whether new or existing at IDEA, will not affect their TCP Placement.</p> <p>TCP Placement must adhere to TCP policies regardless of TIA designation.</p> <p>A manager or teacher can also appeal for consideration if they have a 4.5 composite score and are Master Designated with Texas Teacher Incentive Allotment without the minimum years of teaching experience.</p>	<p>This policy is crafted to establish an inclusive, equitable, and uniform framework for TCP Placement decisions, underscoring our commitment to fostering the professional development and career advancement of every teacher at IDEA.</p>

TEACHER CAREER PATHWAY (TCP) POLICIES

Policy Title	Policy	Policy Rationale
GET with Embedded Core Values Ratings Policy	Ratings will only be adjusted if the manager is not GET with Embedded Core Values Certified.	Teachers are provided the opportunity to engage in a GET with Embedded Core Values rating alignment conversation during the APR.
TCP Placement Hold Policy	If the overall TCP component score leads to a lower TCP placement, the teacher is guaranteed a one-year hold of their current rating to improve the composite score. Upon the conclusion of the hold period, regular TCP-level hold policies will resume.	During the hold year, teachers maintain their current rating, ensuring they do not regress a level and are provided with the opportunity to enhance their performance.
Weight Policy	<p>In cases where a student achievement rubric comprises more than one row, each row is assigned a specific weight.</p> <p>The teacher's total student achievement score is then derived by calculating a weighted average, reflecting the proportional significance of each performance category in the overall assessment.</p>	This approach aims to provide a more accurate representation of a teacher's impact on student achievement by appropriately weighing the various dimensions outlined in the rubric.
Multi-Prep Minimum Counts Policy	<p>All teacher's multi-prep courses will contribute to their overall accountability for student achievement.</p> <p>No minimum student count is required for any course to be considered in reviewing a teacher's student achievement score.</p> <p>A weighted average approach will assess teacher accountability for student achievement across multi-prep courses.</p> <p>The performance of students in each course will be weighted based on factors</p>	Teachers are responsible for the academic success of every student under their instruction.
TCP Policy on TIA Designation Impact	<p>This policy clarifies that a staff member's TIA designation, whether new or existing at IDEA, will not affect their TCP Placement.</p> <p>TCP Placement must adhere to TCP policies regardless of TIA designation.</p> <p>A manager or teacher can also appeal for consideration if they have a 4.5 composite score and are Master Designated with Texas Teacher Incentive Allotment without the minimum years of teaching experience.</p>	This policy is crafted to establish an inclusive, equitable, and uniform framework for TCP Placement decisions, underscoring our commitment to fostering the professional development and career advancement of every teacher at IDEA.

TEACHER CAREER PATHWAY (TCP) POLICIES

Policy Title	Policy	Policy Rationale
GET with Embedded Core Values Ratings Policy	Ratings will only be adjusted if the manager is not GET with Embedded Core Values Certified.	Teachers are provided the opportunity to engage in a GET with Embedded Core Values rating alignment conversation during the APR.
TCP Placement Hold Policy	If the overall TCP component score leads to a lower TCP placement, the teacher is guaranteed a one-year hold of their current rating to improve the composite score. Upon the conclusion of the hold period, regular TCP-level hold policies will resume.	During the hold year, teachers maintain their current rating, ensuring they do not regress a level and are provided with the opportunity to enhance their performance.
Master Teacher Appeal Policy	Master Teacher Appeal Policy: Teachers who maintain a composite score of 4.5 or higher for two consecutive years may submit an appeal for consideration as a master teacher.	We acknowledge that the composite score, with years of experience criteria, presents challenges for teachers to attain level 5. However, sustaining a composite score of 4.5 or higher over multiple years shows a teacher's exceptional performance and dedication. Granting an exemption to the criteria requirement is a recognition of their hard work and commitment.
Teacher Transfer Approval and Communication Policy	The teacher's previous campus is responsible for approving the TCP placement, while the teacher's new campus is responsible for communicating with the previous campus regarding the teacher's placement status.	The previous campus has experience working with the teacher, which can effectively approve the TCP placement. The new campus does not have prior experience with the teacher to make an accurate placement.
Mid-Year Hire Policy	<p>Automatic Placement: Teachers hired on or after January 1 will be automatically assigned to Level 1 - Welcome to IDEA TCP placement.</p> <p>Placement for Pre-January Hires: Teachers hired before January 1 will be placed on the Teacher Career Pathway (TCP) in the fall of the subsequent school year.</p> <p>*Example: If the teacher was hired in December 2023, they will be placed in Fall 2024.</p>	This policy aims to streamline the placement process for mid-year hires, ensuring clarity and consistency in TCP placement across all teaching staff.
Transitioning Teacher to Another Role TCP Placement and Payout Policy	Teachers who transition into another role are eligible for one payout based on their most current TCP placement in the following fall. If student achievement and/or GET with Embedded Core Values APR data is missing, they will be eligible for a payout based on the previous year's TCP placement. Please note that the higher amount between the TCP payout and Team Performance/Incentive Pay will be issued.	This policy is important because it provides clarity and fairness for teachers who are transitioning into another role within the organization. Outlining the criteria for TCP placement and payout in such circumstances provides transparency and consistency in the process.

TEACHER CAREER PATHWAY (TCP) POLICIES

Policy Title	Policy	Policy Rationale
<p>Appeals and Grievance Policy for TCP Placement Policy</p>	<p>Teachers are granted the opportunity for an appeal and grievance within specific timeframes upon receiving their Teacher Career Pathway (TCP) Placement in the fall. There are two steps available for addressing concerns related to the final TCP Level:</p> <p>Step 1: Appeal Process Upon receipt of the teacher's TCP Placement/ TCP Payment, teachers have a 10-business-day window to submit a written appeal.</p> <p>Employees are notified of this 10-day appeal window by distributing an appeal form.</p> <p>Appeals submitted by employees are shared with their TCP Committee and recorded in their TCP portal notes section.</p> <p>Teachers have the option to make a single appeal following TCP placement. Once the appeal is approved or denied, the next step, if necessary, involves filing a grievance with our Human Resources department.</p> <p>Step 2: Grievance Process In cases where appeals fail to resolve concerns or disputes, employees may initiate the grievance process with the Human Resources Department.</p> <p>A grievance form must be filed within fifteen (15) business days from the date the employee first became aware or should have known, with reasonable diligence, of the decision or action leading to the grievance.</p> <p>Filing a grievance will prompt a response and/or necessary actions to address the concern.</p> <p>Employees are encouraged to contact the Human Resources Department for additional information or clarification.</p>	<p>This policy ensures a transparent and structured approach for teachers to address any concerns or disputes regarding their TCP Level, promoting fairness and accountability in the evaluation process. Teachers are provided with clear avenues for resolution, emphasizing the importance of open communication and due process.</p>

TCP Appeals

CAMPUS TCP APPEALS

- After the TCP Manager Review Process, the manager will need VP Approval to move forward with a Campus TCP Appeal.
- VP must provide approval via a Microsoft Certification Form indicating what the manager will be appealing on behalf of the teacher. This form is provided by the TCP Regional Lead.
- Once VP has completed the Certification Form, the manager must submit a separate form documenting the TCP Appeal for the teacher. The manager must provide as much context and details surrounding the teacher appeal.
- The Teacher Evaluation and Recognition Committee will review the appeal and send out formal communication to the manager when final decisions have been made.

TEACHER TCP APPEALS

There is an appeals process available to teachers who find that their pathway placement does not accurately reflect their performance in the classroom. Appeals can be submitted at any time after managers share pathway placements, but must be requested before Thanksgiving break of each year.

THE APPEAL PROCESS IS SUMMARIZED BELOW:

- 1** Teacher assembles data and evidence to support reason for appeal.
- 2** Teacher alerts direct manager about the appeal.
- 3** Teacher submits appeal request located on Compensation Hub Site
- 4** The Teacher Career Pathway team reaches out to the appealing teacher.
- 5** A committee will assemble to review the request, make a final decision, and send results to the teacher.

► More information in regards to TCP Teacher Appeals can be found on the Hub under our Teacher Career Pathway Website.

SECTION 3

**TCP RUBRICS
IDENTIFICATION &
METHODOLOGY**

How To Read A TCP Student Achievement Rubric

TCP STUDENT ACHIEVEMENT RUBRICS										
CONTENT					STUDENT ACHIEVEMENT CATEGORIES					
TYPE	GRADE	CONTENT	SUBJECT/ COURSE	STUDENT ACHIEVEMENT MEASURES	POP	CATEGORY 1	CATEGORY 2	CATEGORY 3	CATEGORY 4	WEIGHT

Where do I find my Content?

Find your Content Rubric Page under the table of contents.

Where do I find my Subject/Course?

Find the rubric by finding the grade and subject pertaining to what you teach.

Where do I find my Student Achievement Measure(s)?

Under the Student Achievement Measures Column, you will see each assessment and how each assessment will be measured.

Where can I find my Possible Results?

For each assessment and its corresponding measurement, your results will be measured depending on:

POP: shows the Student population, which tells you what group of students the results represent.

● **Gen:** shows the results for the general population of students who took the assessment (i.e. all students).

● **SpEd:** shows the results for only the Special Education students who took the assessment.

CATEGORIES: Your results will fall under one of the 5 Student Achievement Categories in each column.

The number in each box represents the minimum score a teacher would have to reach in order to hit that category.

WEIGHT: If a student achievement rubric has more than one row, each row is given a weight. The total student achievement score for a teacher is calculated by the weighted average.

Methodology for TCP Rubrics

STATE TESTED CONTENTS

- Introduction to Normal Distribution 3 years of state data 18-19, 20-21, 21-22
- Mean = Student Achievement 3 Cutoff
- $\frac{1}{2}$ SD Mean = Student Achievement 4 Cutoff
- 1 SD Mean = Student Achievement 5 Cutoff

IB, AP, AND NON-TESTED HUMANITIES AND SCIENCE

- 3 years of internal data 18-19, 20-21, 21-22
- Mean = Student Achievement 3 Cutoff
- $\frac{1}{2}$ SD Mean = Student Achievement 4 Cutoff
- 1 SD Mean = Student Achievement 5 Cutoff

The mean of the data is used to set the student achievement cutoff of a 3, $\frac{1}{2}$ STD up sets the 4 cutoff, and a full STD up is the 5 cutoff.

- Research and Analysis, the Schools Team, and the Programs Team are involved with the creation of TCP rubrics.
- The TCP Team also receives feedback from the Superintendent.
- TCP Rubrics are developed one year in advance.
- Rubrics are presented to the board and approved in the summer.
- TCP Rubrics are approved for use in 24-25 academic year.
- TCP Rubrics used to place teachers in Fall 2025.

SECTION 4

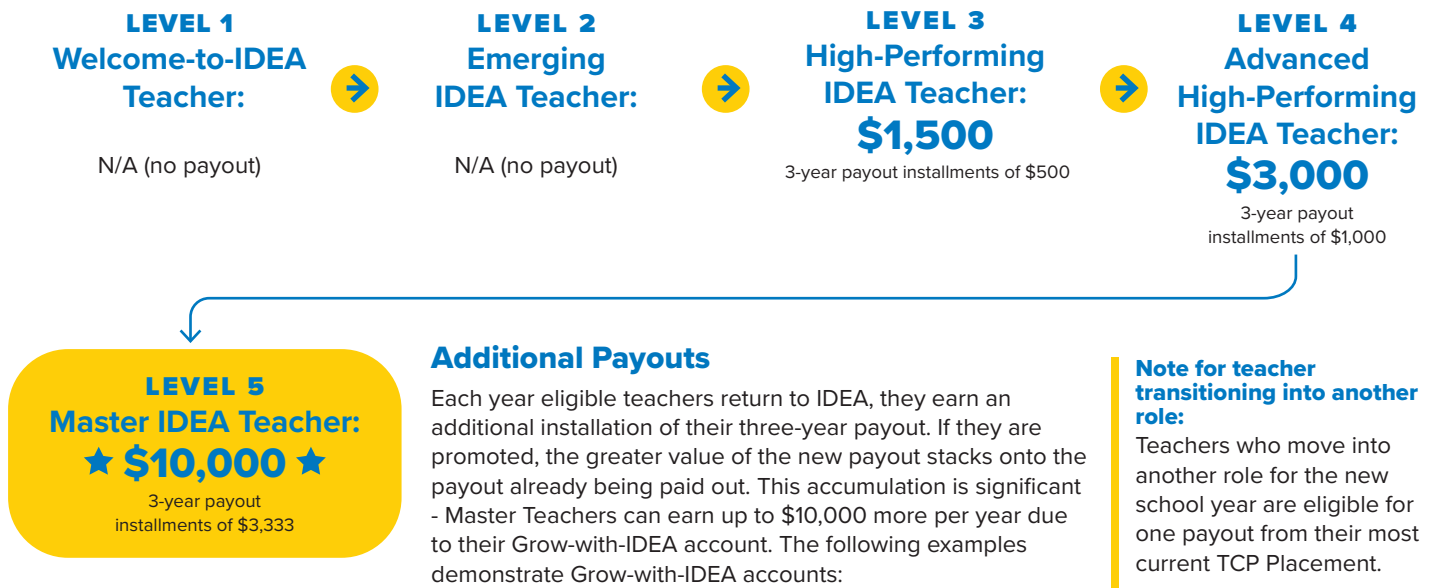

**GROW
WITH IDEA
ACCOUNTS**

Teacher Career Pathway Pay Potential

Grow-with-IDEA Accounts begin at Level 3 (High-Performing IDEA Teacher) on the Teacher Career Pathway. In the first year a teacher is placed at the High-Performing IDEA Teacher level, he or she earns a payout to be paid out in three equal portions. The first portion is received immediately, and the two additional installations are paid over the next two years if the teacher chooses to stay in the classroom at IDEA. This process happens each year, so that current and past payouts accumulate.

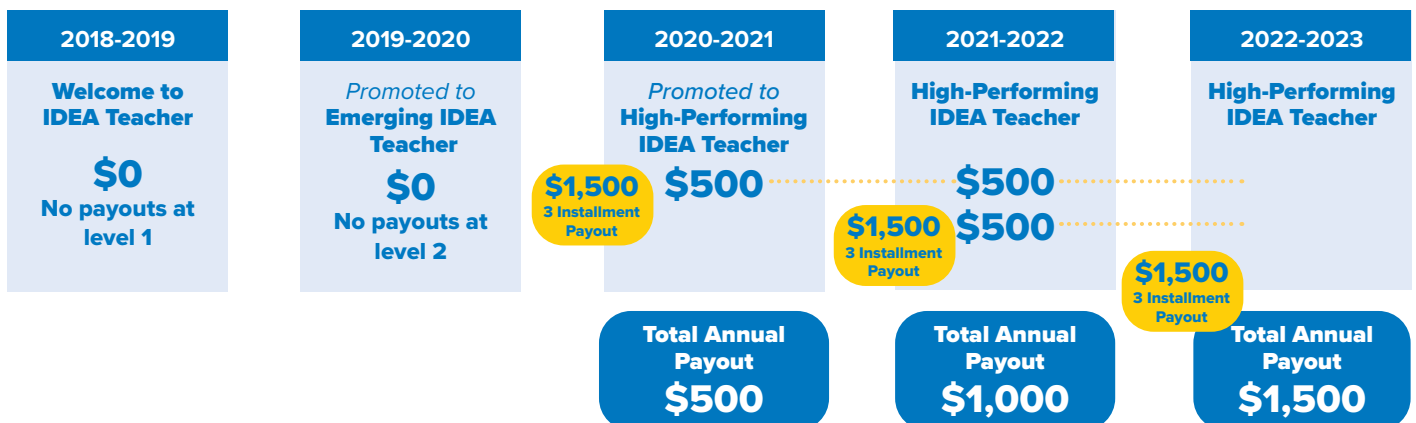

GROW-WITH-IDEA PAYOUT ASSOCIATED WITH EACH TCP LEVEL

Examples

This example shows how a first year IDEA teacher might enter the system in the Fall of 2018. As a first year (at IDEA) teacher, she is automatically placed on the Welcome to IDEA level (level 1). There is not a Grow with IDEA account associated with level one. After her first year, she is promoted to Emerging Teacher Level, which does not have a Grow with IDEA account as a benefit. At the end of her second year, her results lead to a promotion to High-Performing Teacher. When she chooses to return to the classroom as a High Performing Teacher in 2020-2021, she earns her first payout of \$500, with a promise

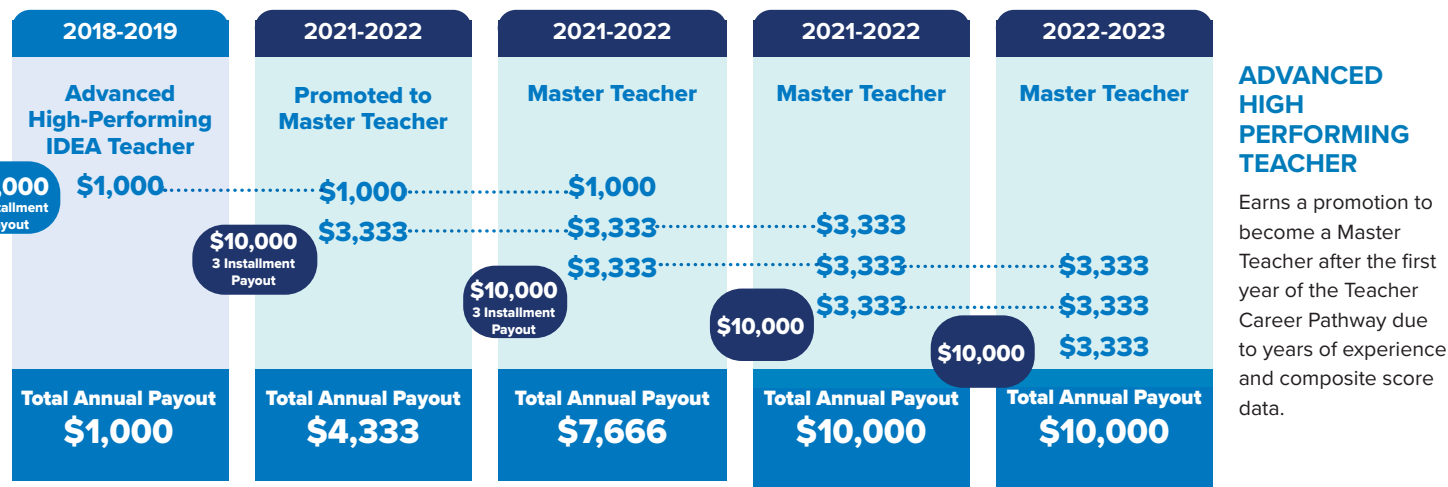

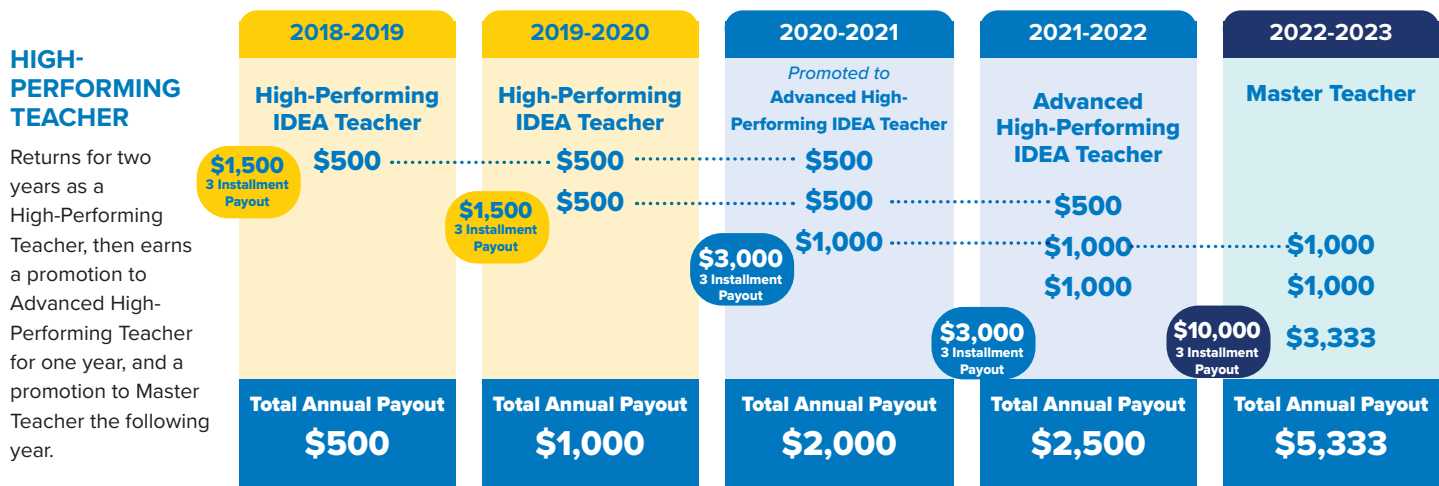

of two more equal payouts in the coming two years. She continues as a High-Performing teacher and returns for the 2021-2022 school year, earning her second payout from last year and her first payout for the new year, earning a total of \$1,000. When she returns in 2022-2023 as a High-Performing teacher, she earns \$1,500 and is fully vested. If she remains as a High-Performing Teacher for her career, she will continue to earn \$1500 each year when she continues in the classroom.

How is TCP Grow with IDEA Accounts Paid Out?

Each year eligible teachers return to IDEA, they earn an additional installation of their three-year payout. If they are promoted, the greater value of the new payout stacks onto the payout already being paid out. This accumulation is significant - Master Teachers can earn up to \$10,000 more per year due to their Grow-with-IDEA account.

The following examples demonstrate Grow-with-IDEA accounts:

Grow-with-IDEA accounts are one of the ways that the Teacher Career Pathway recognizes teachers who choose to stay with IDEA and continually improve their practice.

SECTION 5

IMPORTANT INFORMATION

Answers To Other FAQ

How is student achievement calculated for my specific grade level and subject?

Teacher Career Pathway survey results have included many questions about how student achievement is calculated. Position-specific student achievement rubrics can be found in the appendix of this book

I teach multiple subjects. How will my student achievement component be calculated?

Please refer to the policy section of this handbook to review the multi-prep policy and other relevant policies that may apply to your situation. This will help you understand how to calculate the student achievement component accurately.

I moved from Level Three (High-Performing) down to Level Two (Emerging) before my three-year payout was complete. What happens to my retention payout?

Teachers only move down the pathway after two consecutive years of a lower rating (i.e. if they were unable to improve their scores during the hold year). They will continue to receive all three payouts from each year of being placed at Level Three. For the year that a teacher moved to Level Two, a new payout payout would not be issued because there is not a “Grow with IDEA” account associated with Level Two. However, teachers will continue to receive the payout until they have exhausted their 3 year payout from their level 3 placement.

Why is the Grow-with-IDEA payout paid over three years rather than one?

The Grow-with-IDEA payout is a teacher retention payout. The purpose of the Grow-with-IDEA payout is to incentivize teachers to stay in the classroom at IDEA and reward IDEA teachers who continue their work in the classroom year over year. Teachers are compensated for both their commitment to IDEA and growth as teachers. The Grow-with-IDEA payout is linked to a teacher’s Teacher Career Pathway placement level, but it is not a performance payout. Performance payouts are separate from the Teacher Career Pathway and are still paid to teachers in full every year by IDEA Public Schools.

How are student achievement rubrics created and revised?

The current approach takes the percentage of students that passed the state assessment (FLA for Florida, LEAP for Louisiana, & STAAR for Texas), specifically, the most recent 3 years of state data is used to calculate the average percentage of students that passed. The standard deviation, or the variability around the average, is calculated to develop Level 2-5 bottom cut-offs. The bottom cut-off for Level 2 is calculated by subtracting half of a standard deviation from the average. The bottom cut-off for Level 3 is equal to the average percentage of students passing. The bottom cut-off for Level 4 is calculated by adding half of a standard deviation to the average and Level 5 by adding a full standard deviation to the average. This same methodology is used for AP, IB, and MS non-tested Humanities and Science using internal IDEA Data.

These questions came directly from teacher responses on various Teacher Recognition Feedback Surveys. Thanks for your input!

HOW TO GIVE FEEDBACK ON THE TEACHER CAREER PATHWAY

- ▶ Email TCP@ideapublicschools.org
- ▶ Contact your representative on the Teacher Advisory Council
- ▶ Use the Teacher Recognition Feedback Survey on your Teacher Career Pathway Hubsite.
- ▶ Communicate with your manager

Join the Teacher Advisory Council on your campus!

TAC OVERVIEW

- The Teacher Advisory Council (TAC) is a representative group of teachers elected to facilitate communication with Headquarters (HQ) staff.
- Two TAC representatives are selected per campus, comprising two for academy and two for college prep, nominated by their peers.
- TAC representatives must hold a Level Three (High-Performing) or higher status on the Teacher Career Pathway.
- The council convenes biannually, in fall and spring, to deliberate on agenda items sourced from network-wide groups.

SIGNIFICANT CONTRIBUTIONS

- In the 2014-15 academic year, TAC played a pivotal role in shaping the Teacher Career Pathway, emphasizing absolute measures over relative ones in assessing teacher performance.
- During the subsequent 2015-16 school year, TAC provided feedback that led to enhancements in Teacher Career Pathway benefits.
- This feedback sparked a district-wide initiative to bolster teacher leadership development and support.
- Ongoing improvements in TCP practices are driven by feedback received from TAC representatives annually.
